

OUR REEFER REPAIR ADHESIVE RANGE

EPO
SERIES

Tensorgrip®

WHAT IS TENSORGRIP®?

A leader in canister adhesive systems. Passionately creating success with simplified innovative technology.

No other spray adhesive product can compare to the strength, tenacity and reliability of Tensorgrip®. Available in canisters as well as aerosols, our innovative formula breaks down barriers presented by time-consuming traditional bonding methods.

Four things set Tensorgrip® apart from other adhesive brands:

Unique Range of Adhesives

Our 100% non-flammable contact adhesives outperform others, without compromising time advantages. We developed the world's first cross-linking contacts that change form when cured to develop a highly resistant thermoset bond. These same adhesives are also resistant to plasticizer migration, making them safe for vinyl and rubber bonding.

Simplified Labeling System

To make adhesives easier to choose and identify, we've developed a simple icon-based system of identification so that you can be assured of using the right adhesive.

CO-REZ Technology

Select Tensorgrip® products feature advanced CO-REZ Technology, which is an exceptional formulation incorporating a highly engineered resin and gas matrix. The result: greater coverage from the same container. MORE GLUE—LESS GAS!

Zero Flam Technology

Select Tensorgrip® products feature an easy way to prevent any canister related mishaps... ZERO-FLAM technology. Thanks to a unique propellant system of non-flammable gases, you'll benefit from a 100% non-flammable canister adhesive system. In addition, you'll love the unparalleled spray performance that is only available with our exceptional ZERO-FLAM technology.

REEFER REPAIR ADHESIVE RANGE

Simplifying Adhesive Users' Lives

WHAT SIZES OF TENSORGRIP® ARE AVAILABLE?

Aerosol - 650ML (22 FL OZ)

This convenient aerosol is great for small applications or for less-frequent users. Small but sticks all the same!

Mini - 7L

The Mini is a portable, and yet great for tight spaces. It contains more adhesive than an aerosol so you'll be more efficient with fewer changeovers.

Large - 22L

Our most popular adhesive container, the 22L canister is great for production where ultimate portability is required.

Intermediate - 108L

The 108L canister is portable, but geared toward use in larger-scale production environments.

Jumbo - 216L

The largest in our range, the 216L canister is suitable for the largest-scale production applications. Multi-user friendly.

THE TENSOR LABEL SYSTEM

Choosing the right product for the job should never be a hassle. We have developed a labeling system to help make choosing the correct adhesive as quick and easy as possible! Our aerosol and canister labels are color-coded to fit specifically into the most appropriate markets for use and feature icons that help you define which applications the adhesive is best suited for.

REEFER REPAIR ADHESIVE RANGE

Simplifying Adhesive Users' Lives

3 REASONS YOU NEED TO USE **TENSORGRIP® REEFER REPAIR** ADHESIVE

EASY

Tensorgrip® Adhesive is made to simplify your job. Just 3 steps and a total of approximately 45 minutes per full wall. Only a few minutes of quick instruction and your team is ready to work!

ECONOMICAL

See your profits rise! With such a short turnaround time, you can push more jobs through your shop and get more done in a day.

EFFECTIVE

Trailer manufacturers recommend this glue because Tensorgrip® Adhesive is proven to be stronger than the original factory bond. You won't need to worry about liners coming loose. Here's to happy customers!

STEP 1

After attaching the gun and hose to the canister, simply spray the wall foam & interior liner (e.g. Kemlite, Polar X, PunctureGuard, Versitex) with **Tensorgrip® Adhesive**.
Quick and easy to learn and get it right every time

STEP 2

When the adhesive is dry to the touch, you'll need a team of 3-10 people to work together to get the liner on the wall.
Once on the wall, the liner stays put and won't fall on you - no wasted time bracing the wall up and waiting for glue to cure.

STEP 3

Get maximum strength with the EP0 Roller: push hard and roll the entire wall for a strong, successful repair.
Contact our adhesive experts to demo and trial EP0 in your shop:

EPO-CA

DETAILS

Refrigerated Trailer Repair Adhesive

Description:

Tensorgrip® EPO-CA is a reefer liner repair system that eliminates blocking and bracing, and reduces cure time to 5 minutes so you can increase your profits and keep your customers coming back! Now you can successfully repair a full refrigerated trailer wall in 45 minutes rather than the standard 24 hours.

Advantages:

- Compliant with California VOC laws
- Fast dry with excellent initial bond
- Aggressive: high-strength, permanent bond
- 80% of final strength achieved immediately
- Full strength achieved in 24 hours
- Fast coverage of large areas

Application Tools:

- Hoses: M180
- Application Gun: M125
- Recommended Tip: 11002B

REEFER REPAIR ADHESIVE RANGE - CLEANERS

Simplifying Adhesive Users' Lives

S101

Premium Citrus Adhesive Cleaner

Description:

Tensorgrip® S101: a premium citrus-based adhesive cleaner and remover designed for safe and powerful adhesive removal. Ideal for various applications such as surface cleaning, adhesive spray equipment purging, and decal adhesive residue removal, S101 ensures compatibility with most non-porous materials for hassle-free use. Simplify your adhesive management with Tensorgrip S101—reliable, efficient, and trusted.

Advantages:

- Slow dry for maximum usability
- Compatible with most plastics
- Pleasant citrus scent
- Convenient for purging adhesive spray equipment
- Fully portable system
- 100% Cleaner transfer to surface
- Can be used with most spray guns and hoses

Not for sale or use in California.
